The Platinum Hybrid Mk II Balanced > Halogen Free < Made in E.U. - Limited Edition

Very limited-edition high quality balanced interconnect with extremely purified **platinum(!)** signal conductors with improved platinum coloured HULLIFLEX(*) High Density jacket. With our vast knowledge on metal technology we have started by calculating the ideal specifications of the conductors and matched the type of metal that possessed these numbers. It turned out that two 0.3 mm solid core pure platinum conductors were right on the dot. The impedance between two natural conductors is a very precise 110Ω. The result is thus not only a very attractive looking cable but also probably the best metal based balanced interconnect on the market today. After our very successful introduction of the Platinum Hybrid MK I, we have been looking at any possible improvement, which we realised in a lower capacitance conductor with an improved thicker jacket.

Comes with rhodium plated C - 11.3 (RCA) or silver plated Neutrik XLR balanced connectors. Packed in a beautiful aluminium wallet.

IMPORTANT NOTICE

Our speaker cables are sold either factory-terminated or, mostly, on reels. Depending on the size of the cable these reels contain usually either 50, 100- or 200-meter lengths.

Unfortunately, we do not live in a perfect world. For this reason, there are always a few non-regular lengths in a production run due to e.g. cut-outs during quality control, printing problems, etc.

For this reason, we behold the right to deliver (and charge) lengths with a tolerance in length of plus or minus 5% (five percent) of the standard configuration as mentioned in the price list.

Lengths that have a greater variation are offered at a discount. A list of available types and lengths with discount is to be found at the representative section of our website.

Frits Landesbergen Big Band: The Old Fashioned Way		
A nice spacious, good harmony and great sounding big band with surprising instrument combinations. A lot of playing experience is captured here. For sure you will like the sound because it reminds also to the 60's and the 70's. The sound is too good to let it just fade out and disappear.

Serena: Dances of the Dolls		
Music for children can be of two kinds. It may be intended for children to play or for children to hear. Both kinds of music are characterized generally by brevity and ease of comprehension, and often by characteristic titles related to fairy-tale or songs. This cd offers old and new examples of this tradition, performed by Serena Wang, the most conspicuous music prodigy under the direct tutorage of well-known and highly respected piano teacher Professor Dan Zhao Yi.
